

How to retouch a portrait in Meitu

This tutorial introduces basic steps to retouch a human portrait, by using the Meitu mobile app.

Before you begin:

- Download Meitu app in appstore.

- Prepare the portrait that you want to retouch. The following is an example portrait.

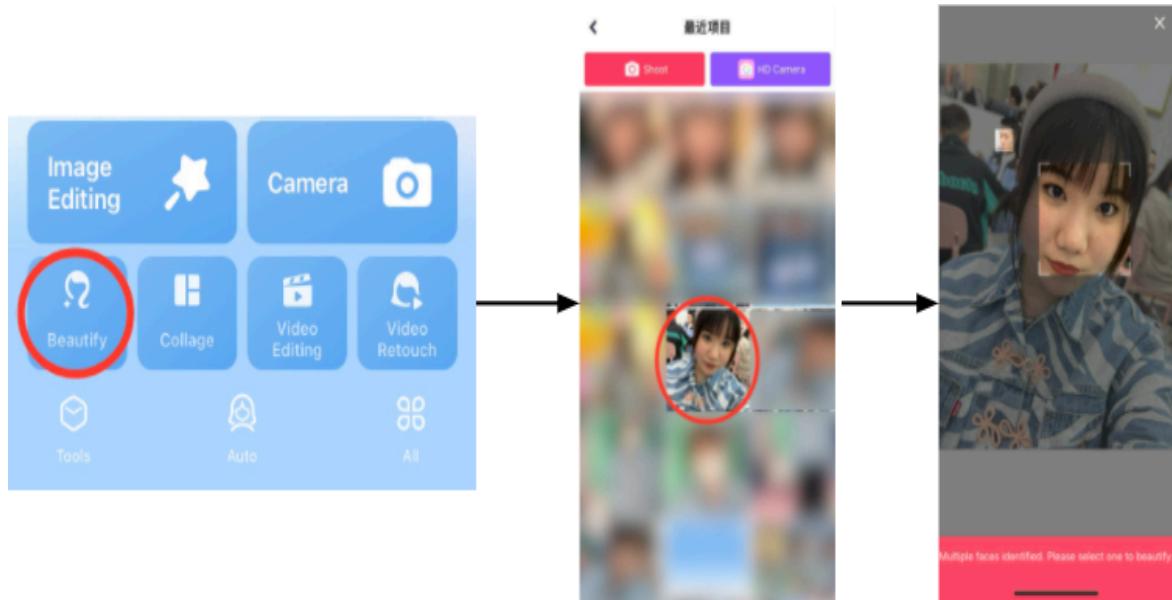

Steps:

1. Select an image.
 - a. Open Meitu app on your phone.
 - b. Tap **Beautify**.
 - c. Select the portrait that you want to retouch.
 - d. Select the face that you want to beautify.

Note:

If the image contains only one face, skip this step.

2. Smooth the skin.

- Tap **smooth** in the tool bar.
- Pull the slider to the right under the Auto mode. 40~70 is a reasonable range.
- Tap ✓ after finished.

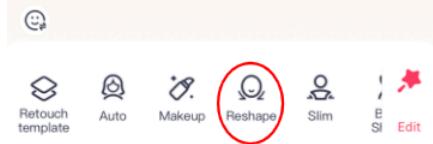

3. Reshape facial structure.

Note:

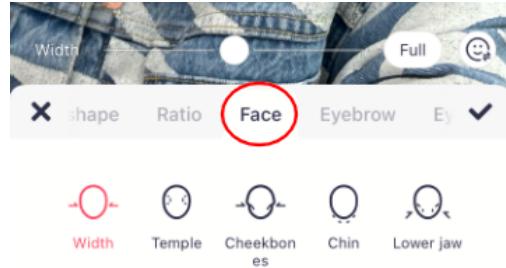

This part only shows the essential and common-used features of reshaping.

- Tap **Reshape** in the tool bar.

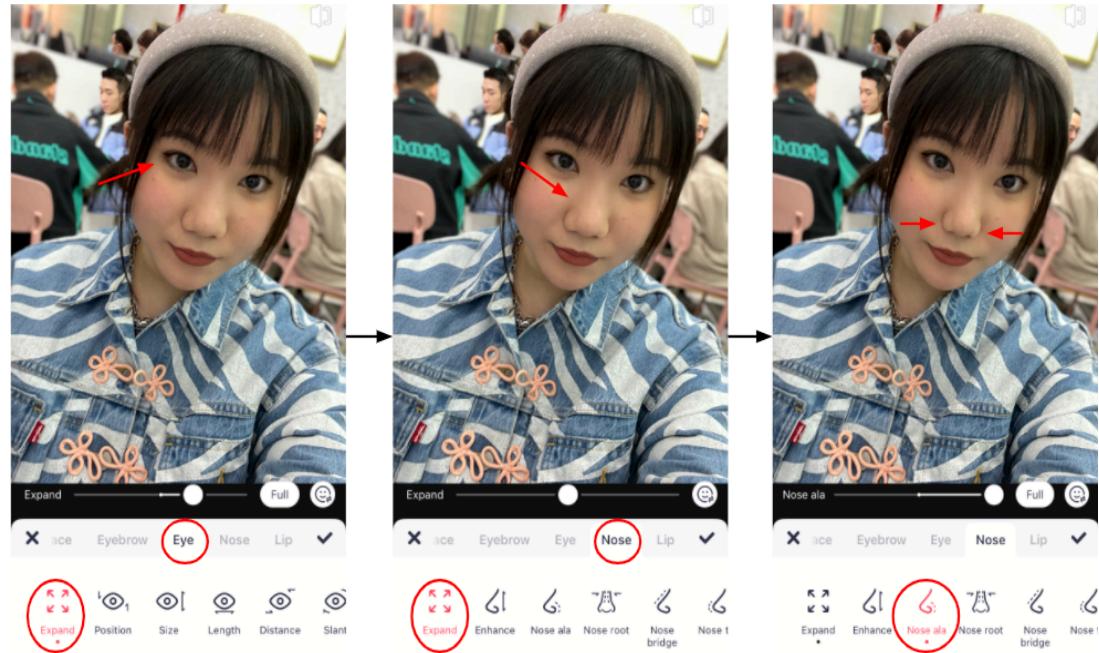

- Choose **Face**. Perform the following features by pulling the slider to reach the wanted effect:

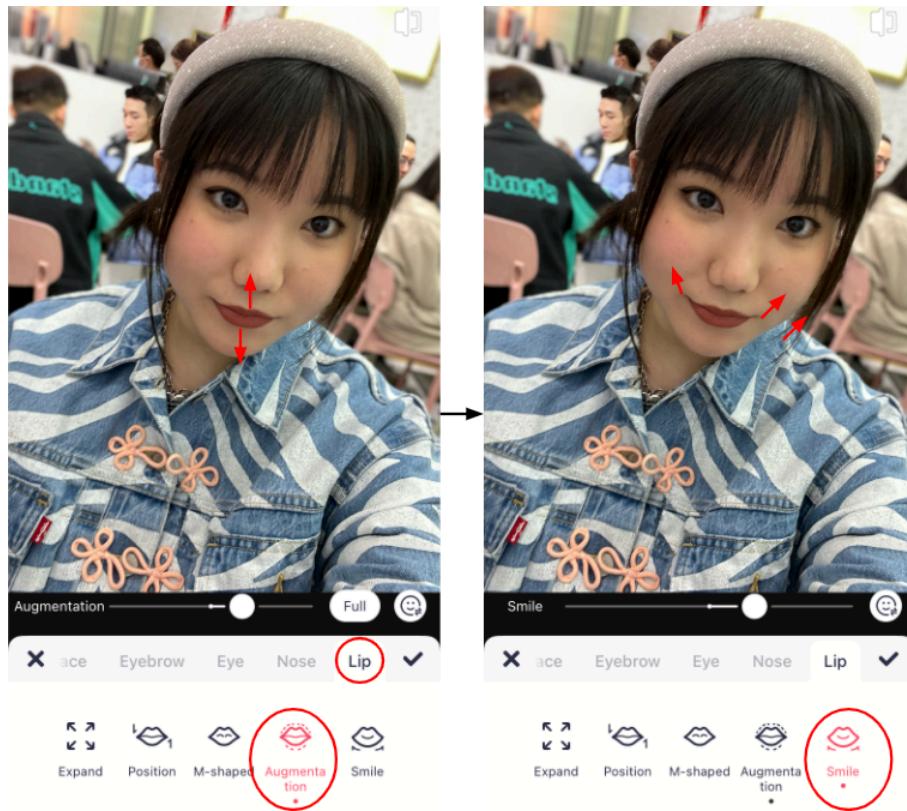

- **Width**: to narrow or widen the face width
- **Temple**: to fill or shrink the temples
- **Cheekbones**: to fill or shrink the cheekbones
- **Chin**: to shorten or lengthen the chin
- **Lower jaw**: to fill or shrink the lower jaw

- c. Tap **Eye > Expand**. Pull the slider to the right to enlarge the eyes.
- d. Tap **Nose > Expand**. Pull the slider to the right to shrink the whole size of nose.
- e. Tap **Nose ala**. Pull the slider to the right to shrink the nose ala.

- f. Tap **Lip > Augmentation**. Pull the slider to the right to make the lips fuller.
- g. Tap **Smile**. Pull the slider to the right to lift up the corners of the mouth, forming a brighter smile.
- h. Tap ✓ after finished.

4. lighten dark circles.

- Tap **Dark Circles** in the tool bar.
- Pull the slider to the right under the Auto mode.
- Tap **✓** after finished.

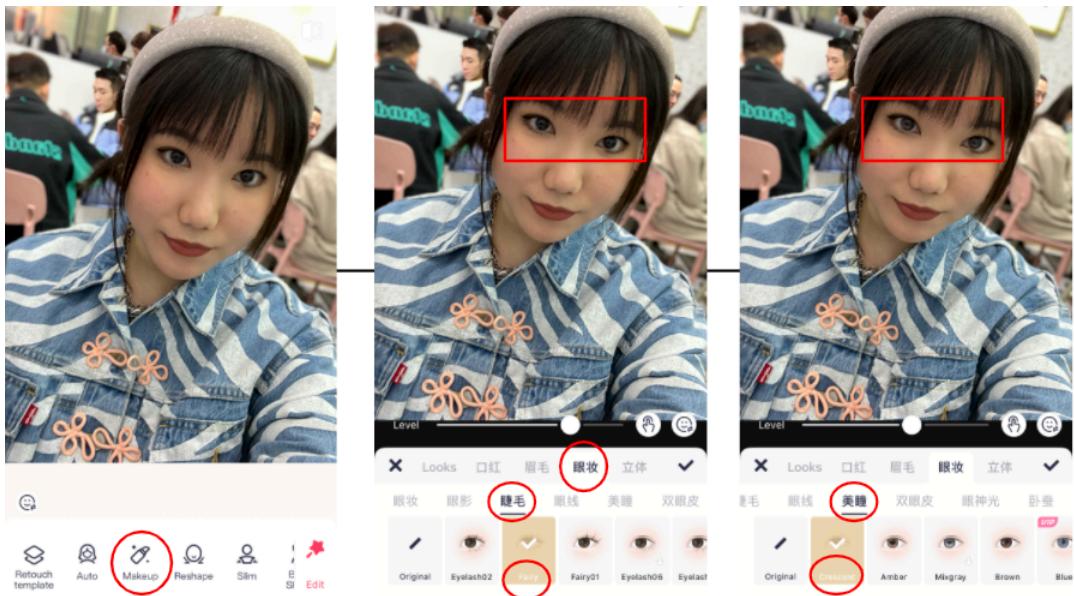

5. Add makeup.

Note:

Pull the slider to adjust the makeup thickness in the following steps.

- a. Tap **Makeup > 眼妆 (eye makeup) > 睫毛 (eyelash) > Fairy.**
- b. Tap **美瞳 (contact lens) > Crescent.**
- c. Tap **✓** after finished.

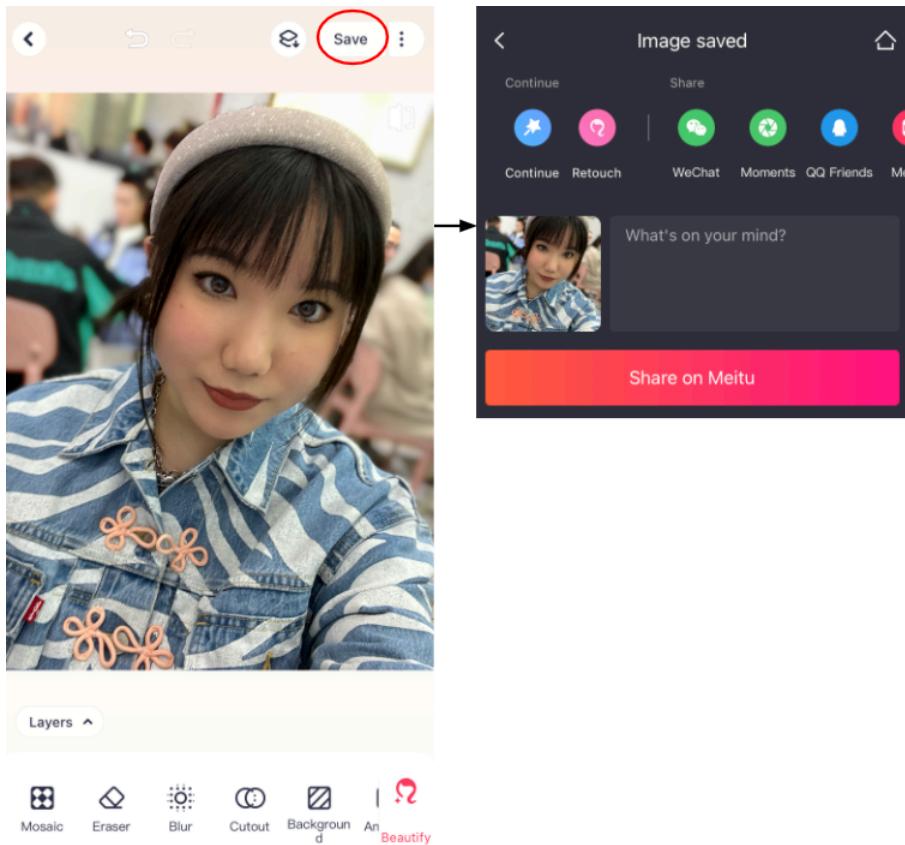

6. Blur the background.

- Tap **Edit > Blur**.
- Pull the slider to the right under the Auto mode.
- Tap **✓** after finished.

7. Tap **save** on the top-right corner.

Result: Now you have successfully retouched your portrait!
